Happy New Year

Welcome to the January edition...

And to celebrate the start of a new year we're running 2 competitions this month. Take your pick from a chance to win a **£20 Touchwood voucher**, or **4 tickets to see The PAW Patrol Movie**.

If your new year's resolution is to do more, or try new things, then have a look to see what local events are running – **there's comedy, live music, shows** - just see what takes your fancy. Or maybe you've challenged yourself to improve or extend your home – if so, there's lots of local businesses who advertise in here who are keen to help.

Here's to a healthy and happy 2022.

NEW YEAR NEW YOU!

START YOUR NEW YEAR WITH A NEW CONFIDENCE

Do you have thinning hair or male pattern baldness? Are you feeling self-conscious or embarrassed about hair loss? Here at the SMP Studio we can help to rejuvenate your natural hairline and in turn, enhance overall confidence, or even make your hair look thicker.

Scalp Micro-pigmentation is becoming an increasingly popular means of addressing hair loss for both men and women. The procedure replicates hair follicles at their shortest length and can either enhance your existing look or create a fresh appearance of closely-cut hair.

Scalp Micro-pigmentation (SMP) can also be referred to as an advanced medical hair tattoo. It is a safe, non-invasive treatment which permanently disguises hair loss of any type once and for all. SMP is performed by a highly skilled practitioner using specially formulated micro needles, machines and techniques to deposit pigment into the epidermal layer of the scalp. These micro deposits of pigment are identical to short length hairs and are matched and blended into your existing hair to create a seamless, completely undetectable result.

The great thing about Scalp Micro-pigmentation is that it gives results from your very first treatment. SMP is performed over 3-4 separate treatment sessions to allow your new treatment to settle in. Each treatment session will give you an even layering of SMP throughout the treated areas.

SMP is a relatively painless treatment and can be used to treat any type of hair loss such as male pattern baldness, thinning hair, alopecia and head scars. SMP is suitable for clients of all ages, male or female.

If you would like more information or a quick chat then please do not hesitate to give me a call or drop me a text to discuss further.

Holiday dreams can come true

This time of year is always a little on the sad side I think. The joy and excitement of the build up to Christmas has been and gone, the sparkly lights are down and back in the loft again, the spring flowers have not quite popped their cheery heads up yet and we are all a bit desperate for something to look forward to! For many of us our thoughts turn to holidays and we wonder, when is the best time to book our next longed for break? As early as possible is my advice. Most airlines release their flight schedules 11 months in advance and many hotels and tour operators are offering discounts for early bookings with guarantees of flexibility if you need to change. The wonderful world of travel is not quite as carefree as it was two years ago but with the support of a trusted travel advisor like myself there is no reason not

to plan and book your dream holiday now. There are so many destinations now open and eager to welcome UK visitors and I can assure you having recently returned from a wonderful relaxing holiday to Lanzarote in December that travelling is not as stressful or complicated as some think. The host countries are pulling out all the stops to make the travellers experience as stress free and easy as possible. Whether your dream holiday is sun kissed beaches, snow-capped mountains, well-trodden hiking trails, a family holiday, a city break or a relaxing cruise there is an adventure out there waiting for you. So, what are you waiting for, pick up the phone and make that holiday dream come true.

Angela Reasbeck, Travel Counsellor.

With us...it's personal

Plants as air purifiers

A friend recently asked me whether there are any plants which might help with the humidity and mould problem in the bathroom and back bedroom of her Victorian house. It's a problem that actually affects many British households. Many of our homes are old, and in our damp climate humidity can rise pretty quickly in the winter when all the windows are closed, and the radiators are on. With increased humidity comes the increased risk of mould and associated respiratory problems

Obviously, we can install a dehumidifier or an extractor fan, but nature also provides her own dehumidifiers and air purifiers in the form of certain house plants.

The best houseplants for mould-prone areas are those which are efficient at absorbing moisture through their leaves. Not all plants are equally efficient at this task so I've selected four of the best.

Each offers a different aesthetic so there should be one that's perfect for you.

English ivy is a native plant and it's a low-cost option. It removes airborne mould, but also other toxins such as formaldehyde and benzene. It grows best in bright, indirect sunlight so is perfect for north-facing rooms. You need to keep it out of reach of toddlers and pets because the leaves are toxic.

Peace Lilies remind me of the film *Hot Fuzz*. Sergeant Angel, played by Sean Pegg loved his Peace Lily, and he had good reason. Not only are they elegant plants with stunning white flowers, but research conducted by

NASA found the Peace Lily to be one of the top indoor plants for air purification. This tropical plant breaks down and neutralizes benzene, formaldehyde, and carbon monoxide.

One of the advantages of a Peace Lily is that it tells you when its thirsty by drooping and that it's getting too much light by turning yellow. They love high humidity areas with indirect sunlight like most bathrooms and are great at preventing mould. Like English ivy the leaves and flowers are toxic.

Palms add a tropical touch to a room

and will efficiently reduce humidity. There are many varieties and some of the best are the lady palm, dwarf palm and reed palm. Indirect light is best and keep the surface of the soil moist but not wet.

The Snake Plant is a wonderfully architectural succulent. Its evergreen sword-shaped leaves grow upright, and almost resemble artificial foliage. It's great at air purification and is one of the few

plants that can convert carbon dioxide into oxygen at night. This quality makes it particularly good for use in a bedroom as it can help regulate healthy airflow. Snake plants can absorb cancer-causing pollutants, including CO₂, benzene, formaldehyde, xylene, and toluene and act as an effective defence against airborne allergies.

Plants can't solve a full-on damp problem and they won't replace a built-in humidifier or extractor fan. But plants are a great way to improve the quality of the air in your home and they look beautiful too.

RUSH ACTIVE YOGA

Choose a Gym

You've made it through Christmas but, as usual, you've come out the other side with a few extra pounds around your middle. It's time to don the workout kit and exercise.

But choosing a gym can be a challenging task. What workout regime do you want? Will you feel comfortable? What facilities and equipment should you be using?

The best way to find this out is to book appointments and visit a few. Most gyms will be happy to have a member of staff walk you around the facility, show you what's on offer and explain what other classes and programs there are. As you go round you need to keep an eye open to work out if this is the right place for you.

Are the staff friendly and helpful?

Chat to some of the trainers and fitness team. They should be happy to talk to you about your goals and offer guidance as to what sorts of exercise might work best for you. You should get a feel for their attitude to new members, especially if you've never been a regular gym goer.

Have a think before you go about what sorts of exercise you might like best. If you prefer classes then you'll need to make sure you ask about their timetable. Ask to see where the classes take place and ask about numbers attending. Too few people can mean a class loses the group energy.

If you like pumping iron, make sure the weight area and machines match your skill level. Again, check numbers as you want to be able to use the equipment without having to wait for too long. Are there enough stations? Is there enough room for what you want to do? Is there enough equipment so you're not waiting for someone else to finish with it before you can get going again?

Functional training is becoming more popular now, where you use body weight and movement to build strength and flexibility. If this is your thing make sure the gym has the right equipment for what you want to do. Is there a big enough space set aside for this activity?

What sort of people are using the gym?

If it's full of body builders you might feel out of place if your aim is simply to tone up a little. If the swimming pool is full of people in their seventies swimming slowly and chatting and you like to sprint lengths, you might need to look elsewhere for your work outs. The gym should be somewhere you enjoy going. Having the right mix of people goes a long way to creating that feeling.

After you've seen round the gym think about attending for a couple of sessions before committing to a membership. Many places offer a proper introductory gym session where a trainer will take you through all the equipment and suggest an individualised workout program. Use this session to confirm whether the place is right for you and to jump start your exercise program.

Going to the gym has to be fun. If it's not you will find excuses not to go. Losing weight and getting in shape is all about perseverance. It's hard work but worth it.

answer on page 45

how to play sudoku

It's simple!

Fill in the grid so that each row, column and 3x3 box, contains the numbers 1 through to 9 with no repetition. You don't need to be a genius. These puzzles use logic alone. Watch out! Sudoku is highly addictive.

answer on page 45

Buttermilk Pancakes

A tasty breakfast treat

Makes 12 pancakes

Preparation time: 25 minutes plus standing time

Cooking time: 15-20 minutes

Ingredients

175g Plain flour
¾ tbsp caster sugar
½ tsp salt
1 tsp bicarbonate of soda
1 egg
375ml buttermilk
3fbsp vegetable oil
Serving suggestions
Whipping cream
Bananas, Blueberries,
or raspberries
Maple syrup and
smoked bacon

Method

Sift the flour, sugar, and bicarbonate of soda

into a mixing bowl. Beat the egg lightly into the buttermilk and vegetable oil in a large jug.

Add the wet ingredients to the dry ingredients and beat to a smooth creamy batter. Leave to stand for at least 30 minutes. Brush a non-stick frying pan with oil and place over a medium heat. Pour enough batter to make 10cm round pancakes.

Cook for 1½ – 2 minutes per side. Set aside on a warmed plate covered with a linen cloth until all pancakes are cooked.

What if you don't have buttermilk?

Creamy, tangy buttermilk lends a beautiful flavour to this recipe but its not an ingredient many of us have lying around. But don't worry, it's incredibly easy to make. Mix 240ml whole milk with 1 fbsp white vinegar or lemon juice. Let it sit for five minutes until it's thickened and curdled slightly. Use it one for one in recipes requiring buttermilk.

So, for this recipe use 360ml milk with 1½ fbsp vinegar or lemon juice.

Plumbing Problems

Would you know what to do?

Frozen Pipes - Turn off the mains water supply. If the frozen pipe has a split, empty the cold-water cistern by opening all the cold taps. If the pipe hasn't split, thaw it out slowly by applying hot water bottles. If any part of the hot water system is frozen or there is a split, turn the central heating off and call a professional.

Burst pipe - Turn off the mains water. Open all the cold taps so the pipes and storage system drain quickly, but do not turn on the hot taps. Turn off the central heating, any electric immersion heaters and call a professional.

Blocked sink or toilet - If the sink is blocked,

unscrew the trap - the u-shaped pipe under the sink (don't forget to put a bowl underneath to catch any water!) - and check. If the blockage isn't there, or your toilet is blocked, use a plunger that completely covers the outlet. It creates a vacuum to suck and push the blockage away. A chemical dissolver breaks down organic material, clearing the blockage away with little or no mess. Call a professional if the blockage remains.

The best way to prevent plumbing emergencies is to make sure your storage system and exposed pipes are well insulated and have your central heating system serviced annually.

The Perfect Cup of Coffee

Do you love a cup of freshly brewed coffee? Me too. But making it is such a faff - coffee grinder, beans, filter, etc. It can get very tedious, especially if you just want

a quick shot. So, what about getting rid of all of that hassle with a coffee pod machine?

Coffee pod machines are a great shortcut to great tasting drinks. Simply load a pre packaged pod into the holder, press brew, and let the machine do all the work for you. Recycle the empty pod and sit back to enjoy your drink. No mess, no fuss.

The machine works by having a precisely measured amount of coffee (along with any other flavourings) in a special pod. When you press the brew button the device draws water from

its reservoir, heats it, and then pumps it through the pod to brew the drink. Your coffee is then poured into your cup and frothed on the way.

The contents of the pod dictate what drink you'll get. There are endless options from

expresso to latte to hot chocolates and other drinks. Some machines allow you to manually vary how the drink is made, others identify each pod and will run the best program for that particular drink.

Prices vary from around £40 to a couple of hundred depending on what features you want. There

are a few different types of pods, and each machine is usually tied to a particular brand, so make sure you check out what's available before you buy. Recycling pods has become a lot easier with initiatives like <https://podback.org/>

"Do they make shopping trolleys out of magnets?"

We don't judge, we just fix it.

What's Your Hobby?

Are you looking for a new hobby for 2022?

We have some great ideas, most of them modest, proving you don't have to spend a fortune to have a hobby.

Painting - If you felt that you failed at art when you were at school why not try again as an adult? It's not about aiming to be the next Monet or Picasso (though you never know!), but about learning to express yourself in a no pressure environment.

Join a Choir - Now that singing is allowed again the time is right to join a choir. Communal singing is good for reducing stress and improving your health. It also helps to make new friends.

Try Pottery - If every you've watched The Great Pottery Throw Down (and if you haven't why not?) and thought 'That looks fun!', now is the perfect time to investigate pottery classes at your local college. It's a tactile, absorbing hobby and you'll get to meet some lovely creative people.

Start a small veggie garden - And when I say small I mean really small. If you've never gardened before it can be daunting. So, choose an old garden pot, or measure out one square metre of your plot and choose something interesting to grow, like rainbow chard, or heritage tomatoes. You even get to eat what you grow. As you become more confident add another pot, or another square metre. Baby steps.

Learn to cook - If you can't cook, buy a simple instructional book, and get stuck in. Delia Smith's How to Cookbooks are particularly good. They take you through which pots and pans you need and even how to boil an egg. If you can already cook, you could set aside one night a week to try a new recipe. You

might decide to try Mexican recipes, or Indian recipes or regional recipes from around the UK. Get the family involved and have fun with it

Photography - We are all photographers now. Every smartphone has a camera. There are evening classes in smartphone photography now. Or maybe you have a nice camera and have never worked out how to use it properly. Taking beautiful pictures is a skill we can all learn and being able to record a beautiful moment: the birth of a child, a special family holiday, or just a sunny afternoon in the garden will make it worth the effort.

Learn to Sew - A few years ago I took an evening class called 'Make do and Mend.' It taught simple skills like hemming, mending and minor adjustments. I even made a festive tablecloth! Of course, you might prefer to make clothes from scratch. Creating my own wardrobe is on my bucket list and one day I'll take a class and begin to learn how.

Take a Walk - Wherever you live there will be a book of local walks. Discover pocket parks, hidden historical monuments and pretty or interesting views. Better still, find a friend to walk and talk with and explore the area around your home.

Learn Language but stay close to home - The UK has some beautiful languages. Choose from British Sign Language (BSL), Welsh or Gaelic. You can attend a class or learn online, or with an app. Duo is a particularly good app for Welsh or Gaelic, and it's completely free. If you prefer in person lessons then most colleges offer evening classes in BSL.

These are some ideas for new hobbies. If nothing here piques your interest, think about what you love to do and then find a class, or a book and get stuck in.

Why not invest in a new driveway or patio to enhance the appearance and add value to your property?

Approved Drives and Landscapes offer a range of services to help improve all areas of your home, including:

Clay & Block Paving - Tarmacing (red or black) - Patios - Brickwork - Slabbing - Gravel - Landscaping - Fencing - Property Repairs - Roofing Repairs - Driveway Maintenance (Pressure cleaning & sealing - weed free)

Fishing for Benefits

Why we should all be eating oily fish

Oily fish are those that are high in omega-3 fatty acid. This is an essential fatty acid which our body cannot manufacture for itself so has

to obtain from food. Omega-3 fatty acid is a polyunsaturated fat, made up of two main fatty acids - EPA (eicosapentaenoic acid), and DHA (docosahexaenoic acid)

The most common and easily accessible oily fish in the UK are salmon, trout, mackerel, sardines, herring, and anchovies. Unlike salmon, which is oily whether fresh, tinned, or smoked, tuna is classed as an oily fish only when fresh and not when it's tinned, because the canning process reduces the long-chain omega-3 fatty acids to levels similar to those in white fish. Also, tuna contains small amounts of mercury, which is toxic to humans, and we are advised to restrict the amount we

eat. Smoked salmon contains a lot of sodium so is best eaten in small quantities, but the soft bones in tinned salmon are positively beneficial for adding calcium and phosphorous to our diet.

Eating a diet rich in oily fish has many health benefits.

Protection against heart disease – Numerous scientific studies have shown that omega-3 fatty acid is beneficial for helping to reduce high cholesterol and high blood pressure, two of the greatest predictors for heart disease.

Neuroprotective properties - The DHA in omega-3 fatty acid, is required for proper brain development and function and offers protection against certain neurological conditions such as Alzheimer's Disease.

Joint protection - Omega-3 fatty acid is naturally anti-inflammatory and has been shown in several scientific studies to offer protection of joints and may even help in the prevention of rheumatoid arthritis.

Positive mental health implications - Because depression appears less common in nations where people eat large amounts of oily fish, scientists have conducted studies which suggest that fish oils may prevent or treat depression and other mood disorders. This may be because omega-3s travels easily through the brain cell membrane and may then interact with mood-related molecules inside the brain. Their anti-

inflammatory actions may help relieve depression and anxiety.

Reduces risk of certain cancers - Omega-3 supplementation is widely employed in the treatment of cancer patients as a supplement to the main treatment. Many research

papers since the 1970s have shown links with omega-3 fatty acid and a reduced risk of certain cancers, including colon, breast, and prostate. This is most likely due to the anti-inflammatory effects of EPA and DHA.

The NHS currently recommends that we include at least two portions of fish in our diet a week, one of which should be an oily fish. One portion is about 140g. However, all girls and women who reached menopause age, including those trying for a baby, or who are pregnant or breastfeeding, should have no more than 2 portions of oily fish a week. A portion is around 140g. This is because the low levels of pollutants that oily fish contain can build up in the body and may harm an unborn baby during a future pregnancy.

A family concern

a good read

reviews By Willow Coby

A Deadly Education

by Naomi Novik

It's no secret that Harry Potter books are read by adults as much as by children. But what if there was a series about a school of magic written especially for adults? Well, that is what Naomi Novik has done. However, it is not wizarding school as you know it.

In this first novel in the Scholomance series we meet El, a student at the Scholomance who is working through her studies, fast approaching graduation. But in this case graduation is not a celebratory event but a fight for survival. As a loner El is in danger. Lone students rarely survive graduation, and her best chance is to find an enclave that will have her. Being born to a Welsh witch she lived most of her childhood in a commune with her mother, away from other sorcerers. This has left her without the support of an enclave, unlike her fellow students such as Orion from the New York enclave. In addition, her penchant for dark magic leaves her isolated from the enclave students.

A school with no teachers or anyone in charge, the students left to fend for themselves, and building up their skills as best they can to fight the malefearia: mana-eating monsters who feed on the students.

Novik is exceptional at transporting you away from this world and into the world she has created. A multi-layered world with a language and natural law system all of its own. It takes a bit of getting used to but is totally worth it.

Point Blanc: The Graphic Novel

by Anthony Horowitz, Antony Johnston, Kanako and Yuzuru

For many young readers the name 'Alex Rider' needs no introduction. Like a teenage James Bond, Alex is a spy who works for MI6. Point Blanc was the second Alex Ryder novel, and this version follows the same story, but adapted into a graphic novel.

Alex is sent undercover by MI6 to Point Blanc, an exclusive school in the Swiss Alps for the rebellious teenage sons of some of the richest people in the world. Two millionaires have been killed and the only connection between them are that they both had sons attending Point Blanc. Can Alex find some connection that will lead to the motive for the killings?

Full of gadgets, chases, and thrills, the original series of books have been a huge hit with teenage readers. This graphic novel is especially suited for reluctant readers who struggle with large amounts of descriptive text, along with fans of graphic novels in general.

Personal Electric Transport

Our efforts to be green have been centring around transport recently. The UK is set to ban the sale of petrol and diesel cars by 2040. But what about going even greener still with small, personal electric vehicles.

Personal Light Electric Vehicles (PLEV) have been around since the Eighties. The concept was pioneered by Sir Clive Sinclair with his C5. At that time, the vision of personal electric transport was ahead of its time as the technology for batteries and motors could not deliver a truly usable vehicle. But in 2021 electric powered bikes and scooters have now made their way on to our streets and roads.

So, what are your choices and what are you legally allowed to do with these new PLEVs?

E-bikes are the easiest to understand. These are basically bicycles, (so they are not classed as an electric vehicle), with an electric motor and battery bolted on to the frame to provide power assistance to your normal pedalling. Providing your electrically powered bicycle has working pedals, a less than 250 W motor, and a top speed of under 15 mph it still classes as a bicycle. You can ride it on roads, cycle paths and anywhere else a pushbike is legal. You can of course buy more powerful e-bikes, but as soon as you go above these specifications they are classed as a motorbike and you'll need a licence, road tax, insurance, and everything else that goes with it.

An alternative is to go for an electric scooter. You've probably seen these popping up around the country in various rental hire schemes. These are basically stand-up scooters with a

Going Green on the Roads

battery and motor built into the footplate. With a throttle and brake built onto the handlebars you simply step on and off you go.

But one of the big differences to e-bikes is that electric scooters are actually illegal to ride on UK roads. This may come as a surprise as you've no doubt seen numerous people zipping around towns on rental machines. Scooter law is evolving fast and rental scooters have been given special permission to run on roads while the government analyses their effect on town congestion and traffic usage.

But this special permission is not (yet) extended to privately owned personal electric scooters. These are still classed as electric vehicles which would again mean having tax, insurance, etc. to be legal on the roads. Even then, because they fall into the Personal Light Electric

Vehicle category, their low-power and maximum speed mean they can't be used on public roads. This leaves scooters stuck in an inconvenient situation, even if you made them road legal...they wouldn't be road legal!

There is a lot of pressure to change this, but for now if you have a personal electric scooter you are only legally allowed to use it on private land where you have the landowner's permission. Riding a scooter on the road or pavement is breaking the law and you could be prosecuted.

So, before you invest in one of these innovative personal transport solutions do make sure that you are legally allowed to use it to get to where you want to go. With the potential savings in carbon emissions and traffic congestion expect the laws to change quickly over the next few years as we all try to do our bit to save the planet.
